

GreenThumb

Smart Urban Plant Care & Community Gardens

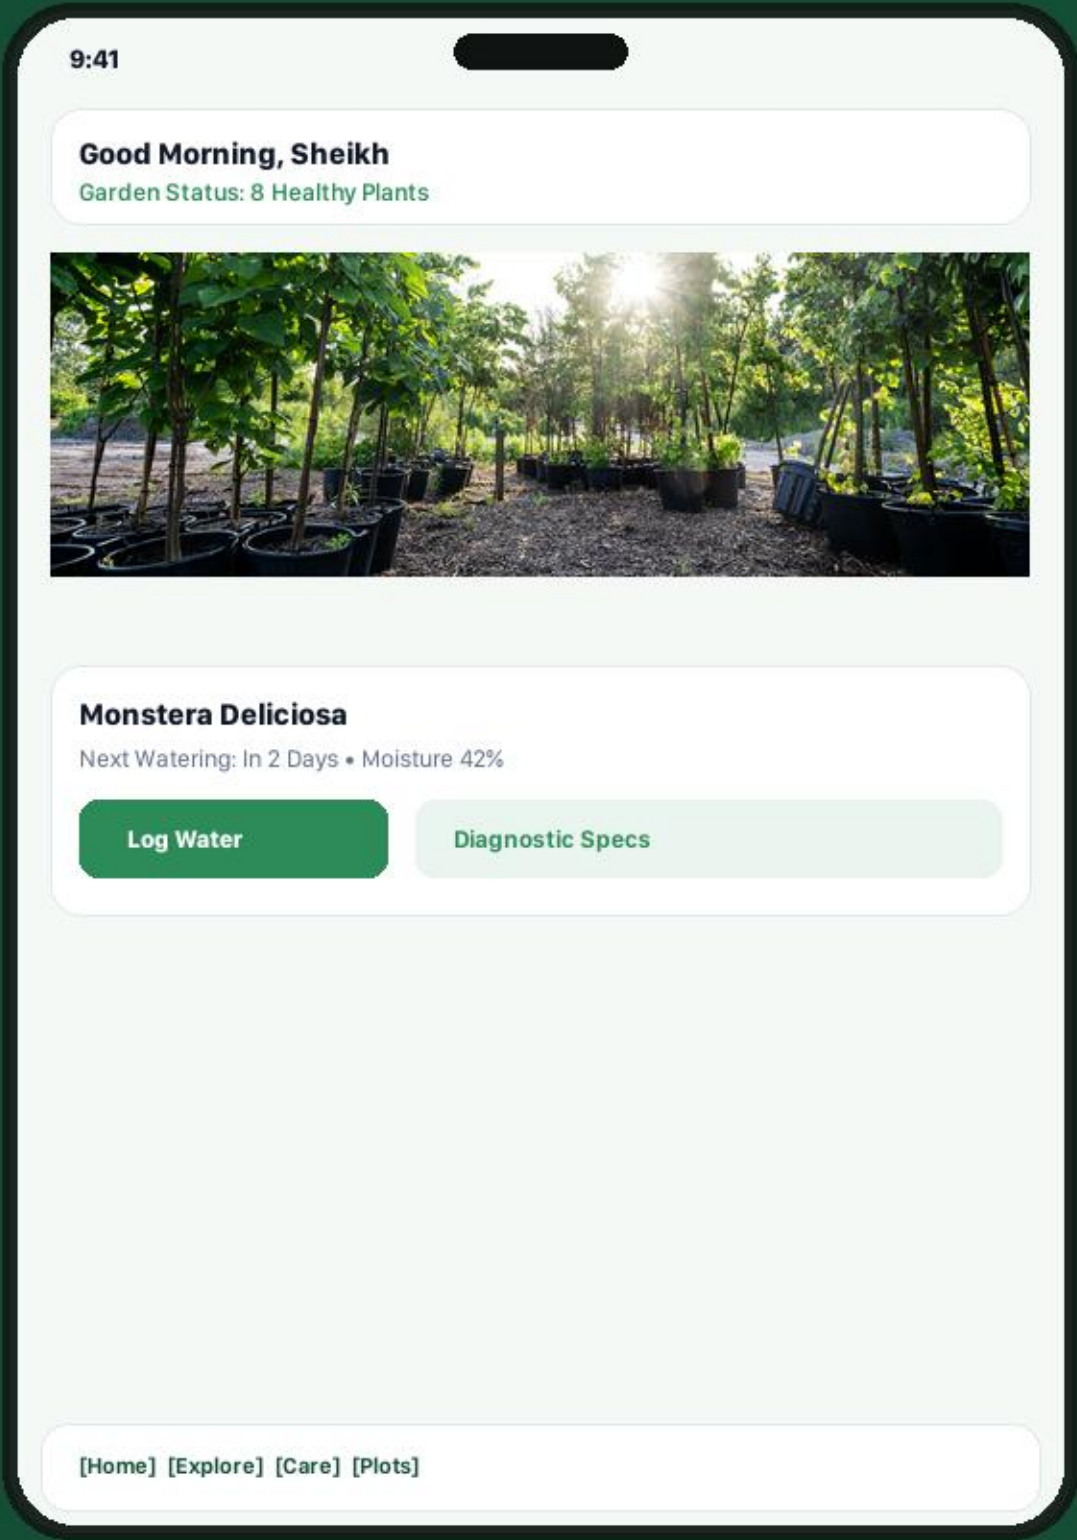

Bridging proactive telemetry, plot logistics, and peer-to-peer produce exchange.

● Smart Telemetry

Automated hydration
& sunlight logs

● Plot Logistics

Reserve community
beds & waitlists

Solving the Urban Agriculture Bottleneck

Urban growers face 3 critical systemic barriers that stifle plant viability and community growth.

1. Inconsistent Telemetry

Untracked soil moisture, guesswork sunlight exposure, and erratic watering routines cause over 70% of urban plant mortality.

GreenThumb Solution: Real-time telemetry dials, soil hydration logs, and proactive EasyCare health countdowns.

2. Fragmented Plot Logistics

Neighborhood garden plots are managed on manual clipboards or unmaintained spreadsheets with zero live availability.

GreenThumb Solution: Interactive plot map (e.g. Plot 12 North Section), automated waitlists, and shared maintenance tasks.

3. Isolated Harvests & Supplies

Growers lack a trusted local channel to swap surplus produce, buy verified seed kits, or attend pruning workshops.

GreenThumb Solution: Peer-to-peer produce trading marketplace and community masterclass calendar with RSVP booking.

● The Unified Mobile + Web Ecosystem

GreenThumb bridges the physical-digital divide by unifying personal IoT hydration tracking with neighborhood community garden administration in one intuitive interface.

Core User Journeys

Intuitive thumb-zone navigation engineered for community plot booking and local trading.

Community Gardens & Plots

Oakridge Garden • 48 Active Plots

Plot 12 (North Section)

Status: Available • Sunlight: Full Sun

Join Plot Waitlist

Local Produce & Seed Market

Verified Growers • 12 Active Trades

Heirloom Tomato Seed Kit

Vendor: GreenHaven Nursery • \$24.99

Message Vendor

Real-Time Telemetry

Live soil hydration, sunlight dials & automated care logs.

Direct Messaging

Peer-to-peer grower communication & produce swap offers.

Geo-Plot Tracking

Interactive neighborhood radius search & plot reservations.

Scalable Systems & WCAG AAA Compliance

Production-ready token library built for contrast, clarity, and rapid scalability.

WCAG 2.1 AAA Contrast

Strict 7:1+ contrast ratios ensure effortless readability under direct outdoor sunlight and for low-vision growers.

[AAA] 7.2:1 Contrast on White

[AAA] 48px Minimum Touch Targets

[AAA] Tactile Haptic Affirmations

[AAA] Dynamic Type Scale (12-36px)

Reusable Component Library

Modular design tokens and states built in Figma with dynamic responsive constraints and auto-layout.

Primary Filled Button

Status Chip: 96% Health

Alert Badge: Water in 2 Hours

Navigation Pill: [Home] [Care]
